

What is claimed is:

1. A sealing agent for Liquid Crystal dropping method  
for LCD panels which comprises a photostetting component, a  
thermosetting component and a photostetting agent,  
5 characterized in that the reduction in the logarithm of the  
specific resistance of liquid crystals as determined by  
Measurement Method A described in the Detailed Description  
of the Invention is 8 % or less, and the change in the  
phase transition temperature of the liquid crystals as  
10 determined by Measurement Method B in the Detailed  
Description of the Invention is 0.5°C or less.

2. The sealing agent according to Claim 1,  
characterized in that the reductions in weight at room  
temperature and at 150°C as determined by Measurement  
15 Method C described in the Detailed Description of the  
Invention are 0.05 weight % or less and 0.5 weight % or  
less, respectively.

~~3. A LCD panel manufactured by using the sealing agent  
according to Claim 1 or 2.~~
